

TOP-Coat-System 700

Our ground-breaking solution for clean room surfaces

suitable for all high-wear walls and ceilings

Advantages:

- Seamless and jointless
- Withstands any decontamination method
- Highly durable
- Resistant to all approved disinfectants
- JIS 2801 : 2000 compliant
- ASTM 621-96 compliant
- Can be applied to virtually any surface
- Highly resistant to chemicals
- Resistant to hydrogen peroxide H₂O₂
- Permanently sterile
- Effective protection against MRSA
- Smooth easy clean surface
- Environmentally friendly
- Emission-free
- Available in any colour scheme
- Easy to apply

Areas of application:

- Laboratories
- Hospitals
- Animal husbandry facilities
- Food industry

Our *TOP-Coat-System 700* is the perfect combination of the positive properties of a glass textile base, a filling and a top coat. This innovation is based on our latest development and fulfils the most demanding requirements. *TOP-Coat-System 700* stands for a mechanically highly resistant, pliable and smooth surface for the highest wear areas. It is the result from combining the high tensile strength of glass textile wallcoverings (>1,000 N per 5 cm to DIN 53 857), our new *TOP-Coat Filler 707* (VOC-free, 100 % solid, bonding strength > 6) and the final coat *TOP-Coat Finish 735*, which is a further development of our well proven *Finish 435*.

Surfaces covered with *TOP-Coat* are permanently resistant to colonisation by microorganisms as well as MRSA and are extremely easy to clean.
